China Cabin Hillary Don 2017-05-01 China Cabin is an account of the restoration of the aft deck-house of the wooden sidewheel paddle steamship China, built in 1867. The 20 feet by 46 feet fragment is the only existing relic in the world of the ships built by one of America's foremost wooden ship designer and builder-William Henry Webb (1816-1899). Webb designed and built 137 exceptional wooden ships, from an iron-clad warship sold to Napoleon III of France to famous Clipper sailing ships. China was constructed in 1866-67 for initiation of the Pacific Mail Steamship Company's (PMSSC) transpacific mail, freight and passenger service from San Francisco to Hong Kong, and from China via Yokohama, Japan. Deemed by some to be obsolete at birth because more efficient and fire-resistant metal screw-propelled steamships were being built in the United Kingdom, China was laid off by PMSSC in 1882. Sold for scrap in 1885, China was set afire for her metals, on the Tiburon peninsula in 1886. However, all potentially saleable items were saved before burning, including the aft deckhouse, composed of the Social Hall and the staterooms of the ship's surgeon and chief engineer. The structures saved were sold and was used as a residence or, partitioned across the middle, as two residences, for 93 years. Resting on pilings along the shore of Belvedere Cove, it was to be demolished by 1979 to allow for open-space at its site. Belvedere-Tiburon Landmarks Society, led by Beverly Wright Bastian Meyers, stepped forward to save this historical reminder of early wooden sidewheel paddle steamships, one of the most significant maritime historical structures on the West Coast of the United States. Invitations to a Captain's Dinner on the restored China Cabin on 11 July, 1986, marked completion of the magnificent restoration to its state when it was first-built. The cost was near to a million dollars, a few pennies short of the cost of constructing the entire original wooden sidewheel paddle steamship China. The whole cost was borne by the Belvedere-Tiburon Landmarks Society's fund raising and volunteer activities, fulfilling its original pledge to the penny.

Engineering BGM Alan Brace 2007-11-01 Also known as the Libor market model, the Brace-Gatarek-Musiela (BGM) model is becoming an industry standard for pricing interest rate derivatives. Written by one of its developers, Engineering BGM builds progressively from simple to more sophisticated versions of the BGM model, offering a range of methods that can be programmed into production code to suit readers' requirements. After introducing the standard lognormal flat BGM model, the book focuses on the shifted/displaced diffusion version. Using this version, the author develops basic ideas about construction, change of measure, correlation, calibration, simulation, timeslicing, pricing, delta hedging, barriers, callable exotics (Bermudans), and vega hedging. Subsequent chapters address cross-economy BGM, the adaptation of the BGM model to inflation, a simple tractable stochastic volatility version of BGM, and Brazilian options suitable for BGM analysis. An appendix provides notation and an extensive array of formulae. The straightforward presentation of various BGM models in this handy book will help promote a robust, safe, and stable environment for calibrating, simulating, pricing, and hedging interest rate instruments.

The Zona Nathan L. Yocum 2012-02 It started with the Storms.The world got too hot too fast. The weather wrecked Hell on man's shiny, pretty civilization. With the heat and wet came bugs, with bugs came new diseases, and man's numbers and sanity dwindled.The survivors reformed governments like petty shadows of the world's old empires. They sought answers and justifications, they sought redemption for what they perceived as man's holy smiting>Welcome to the Arizona Reformed Theocracy, otherwise called The Zona.Here the Church rules with power absolute. The laws are simple, all sin is punished swiftly. Preachers enforce the Church's words like old West lawmen.But what happens when a Preacher refuses to kill? A Historical Guide to Edith Wharton Carol J. Singley 2003-01-30 Edith Wharton, arguably the most important American female novelist, stands at a particular historical crossroads between sentimental lady writer and modern professional author. Her ability to cope with this collision of Victorian and modern sensibilities makes her work especially interesting. Wharton also writes of American subjects at a time of great social and economic change-Darwinism, urbanization, capitalism, feminism, world war, and eugenics. She not only chronicles these changes in memorable detail, she sets them in perspective through her prodigious knowledge of history, philosophy, and religion. A Historical Guide to Edith Wharton provides scholarly and general readers with historical contexts that illuminate Wharton's life and writing in new, exciting ways. Essays in the volume expand our sense of Wharton as a novelist of manners and demonstrate her engagement with issues of her day.

Prince2 Foundation Training Manual Van Haren Publishing 2017-01-15 Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.
