**Symbolizing America** Hervá Varenne 1986-01-01 Anthropologists since Franz Boas and Margaret Mead have traditionally gone off to study ‘primitive?’ cultures. This collection of original essays breaks new ground in showing how anthropological theories and techniques can be applied to the culture of contemporary middle-class Americans. ø InSymbolizing America, ten well-known anthropologists pursue self and identity as cultural rather than psychological matters. Looking homeward, they ask ‘What Is American about America??’?How do we know?? and ‘What difference does it make??’ They analyze such aspects of American culture as advertising, mass-audience movies, patriotic and ethnic parades, church minutes, college parties, greetings, and the dilemmas of adolescent sexuality. Concerned with familiar interactions, they arrive at new insight into the experience of daily life in America. ø In their symbolic and semiotic approaches, the authors express the variety yet surprising unity of a dynamic American culture. Chapters include ‘?Creating America,?’?Doing the Anthropology of America,?’ and ‘?Drop in Anytime?: Community and Authenticity in American Everyday Life?’ by the editor, Hervá Varenne, Teachers College, Columbia University; ‘?Freedom to Choose: Symbols and Values in American Advertising?’ by William O. Beeman, Brown University; ‘?The story of [James] Bond?’ by Lee Drummond, McGill University; ‘?The Melting Pot: Symbolic Ritual or Total Social Fact?’ by Milton Singer, University of Chicago; ‘?The Los Angeles Jews ?Walk for Solidarity?: Parade, Festival, Pilgrimage?’ by Barbara Myerhoff and Stephen Mongulla, University of Southern California; ‘?History, Faith, and Avoidance?’ by Carol Greenhouse, Cornell University; ‘?The Discourse of the Dorm: Race, Friendship, and ?Culture? among College Youth?’ by Michael Moffatt, Rutgers University; ‘?Why a ?Slut? is a ?Slut?: Cautionary Tales of American Middle-Class Teenage Girls? Morality?’ by Joyce Canaan, Centre for Contemporary Cultural Studies; and an epilogue, ‘?on the Anthropology of America,?’ by John Caughey, University of Maryland.

**Becoming an Anthropologist** Gerald Mars 2015-10-05 Mars’ Graphic and often vivid narrative can be read simply as the anecdotal memoirs of an anthropologist. The experiences he recounts are sometimes hilarious, touch occasionally on the dangerous, and are always sensitively and expertly explored. But for those who want to know more, the book’s expansive footnotes and references to key sources also offer a stimulating introduction to social anthropology, its theories and its methods. Mars begins by describing his childhood life in a tightly structured working class community during World War Two. He then contrasts this with an account of the hidden underlife of an entrepreneurial, crime-prone seaside resort, Blackpool, where he worked as a spieler (barker). Two years’ experience of National Service provides an account of the social organisation of the RAF, followed by discussion of aspects of the organisation of Cambridge University.

What follows then is a lifetime spent living and working in different cultures around the world. The results are continual insights gained by comparison and contrasts that illuminate aspects not only of other cultures, but, also, of our own. **Clinical Massage in the Healthcare Setting - E-Book** Sandy Fritz 2008-01-28 Covering advanced massage therapy skills, this practical resource prepares you to work with medical professionals in a clinical setting, such as a hospital, hospice, long-term care, or other health-related practice. It discusses the many skills you need to succeed in this environment, helping you become a contributing member of an integrated team. Also covered are the essentials of clinical massage, such as indications and contraindications, review of massage methods, range of motion testing, SOAP note documentation, and a massage therapy general protocol. Case studies show how a multidisciplinary approach applies to real-world clients. By coordinating your work with other health professionals, you can enhance patient care in any clinical setting! Includes a DVD with: Two hours of video showing specific applications, featuring author Sandy Fritz. A complete general protocol for massage. State-of-the-art animations depicting biologic functions and medical procedures. 700 full-color illustrations accompany procedures, concepts, and techniques. An integrated healthcare approach covers the healthcare environment and the skills necessary to be a contributing member of an integrated healthcare team. A research-based focus emphasizes research, clinical reasoning, and outcome-based massage application — for effective massage application in conjunction with healthcare intervention. A complete general protocol provides a guide to treating disorders and maintaining wellness, with recommendations for positioning and interventions, using a step-by-step sequence that can easily be modified to meet a patient’s specific needs. A palliative protocol helps you temporarily relieve a patient’s symptoms of disorders or diseases. Case studies focus on outcome-based massage for individuals with multiple health issues, detailing assessment, medical intervention, justification for massage, and session documentation. Coverage of advanced massage therapy skills and decision-making skills includes specific themes for effective massage application, allowing you to consolidate massage treatment based on the main outcomes — useful when working with individuals with multiple pathologies or treatment needs. A discussion of aromatherapy provides safe recommendations for the use of essential oils in conjunction with massage, to promote healing of the body and mind. Descriptions of illness and injury include relevant anatomy/physiology/pathophysiology, as well as strategies and massage applications to use for pain management, immune support, stress management, chronic illness, and post-surgical needs. Coverage of insurance and reimbursement issues relates to you as a massage professional. Strategies for general conditions such as substance abuse, mental health, orthopedic injury, and cardiovascular disorders help you specialize in clinical massage. Expert authors provide knowledge in research, massage therapy in healthcare, and manual therapies. Learning resources include chapter outlines, chapter learning objectives, key terms, and workbook-style exercises. A companion Evolve website includes: PubMed links to research supporting best practices and justification for massage application. More information on topics such as insurance, pharmacology, and nutrition. More information on anatomy and physiology and other subjects. A comprehensive glossary with key terms and some audio pronunciations.

**How to Do Your Research Project** Gary Thomas 2009-06-04 Are you doing a research project? Do you need advice on how to carry out research? Does writer’s block get in the way of your dissertation? Nearly all students need to do a research project at some point during their degree. How to do your Research Project guides you through the different phases of doing so. With practical examples, Thomas explains what should happen at each project phase, detailing the main design frames and methods used in social science research, and providing down to earth and practical advice on weaving these elements together into a coherent whole.

**On the Move** Oliver Sacks 2015-04-28 When Oliver Sacks was twelve years old, a perceptive schoolmaster wrote in his report: “Sacks will go far, if he does not go too far.” It is now abundantly clear that Sacks has never stopped going. From its opening pages on his youthful obsession with motorcycles and speed, On the Move is infused with his restless energy. As he recounts his experiences as a young neurologist in the early 1960s, first in California, where he struggled with drug addiction, and then in New York, where he discovered a long-forgotten illness in the back wards of a chronic hospital, we see how his engagement with patients comes to define his life. With unbridled honesty and humor, Sacks shows us that the same energy that drives his physical passions—weight lifting and swimming—also drives his cerebral passions. He writes about his love affairs, both romantic and intellectual; his guilt over leaving his family to come to America; his bond with his schizophrenic brother; and the writers and scientists—Thom Gunn, A. R. Luria, W. H. Auden, Gerald M. Edelman, Francis Crick—who influenced him. On the Move is the story of a brilliantly unconventional physician and writer—and of the man who has illuminated the many ways that the brain makes us human.

**The Mighty Mars Rovers** Elizabeth Rusch 2017-06-27 On June 10, 2003, a little rover named Spirit blasted off on a rocket headed for Mars. On July 7, 2003, a twin rover named Opportunity soared through the solar system with the same mission: to find out if Mars ever had water that could have supported life.A thrilling addition to the acclaimed Scientists in the Field series, The Mighty Mars Rovers tells the greatest space robot adventure of all time through the eyes and heart of Steven Squires, professor of astronomy at Cornell University and lead scientist on the mission. This suspenseful page-turner captures the hair-raising human emotions felt during the adventures with two tough rovers.”

**The Man Who Mistook His Wife for a Hat** Oliver Sacks 2021-09-14 In his most extraordinary book, the bestselling author of Awakenings and “poet laureate of medicine” (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks’s The Man Who Mistook His Wife for a Hat tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks’s splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine’s ultimate responsibility: “the suffering, afflicted, fighting human subject.”

**How to do your Case Study** Gary Thomas 2010-12-14 Case Study is one of the most widely applied methods of research and instruction in use today. Cases are used to frame research, aid teaching and help learning the world over. Yet, despite being so widely used, there remains a great deal of uncertainty about what constitutes case study research and how case studies should be designed and carried out. In this lucid, accessible and often witty new text, Gary Thomas introduces students and researchers to the basics of case study research. Using a wide range of real-life examples, this book sets out for those new to the method how best to design and carry out case studies in the social sciences and humanities How to do your case study: a guide for students and researchers deals with the core issues and methods that anyone new to case study will need to understand: - What is a case study? - When and why should case study methods be used? - How are case studies designed? - What methods can be used? - How do we analyse and make sense of our data? - How do we write up and write about our case? How to do your Case Study will be essential reading for any student or researcher in the Social Sciences, Health Sciences, in Business Studies, in Education and the Humanities.

**Oaxaca Journal** Oliver Sacks 2012-07-05 Oliver Sacks, the bestselling author of Awakenings and The Man Who Mistook His Wife for a Hat, is most famous for his studies of the human mind: insightful and beautifully characterized portraits of those experiencing complex neurological conditions. However, he has another scientific passion: the fern . . . Since childhood Oliver has been fascinated by the ability of these primitive plants to survive and adapt in many climates. Oaxaca Journal is the enthralling account of his trip, alongside a group of fellow fern enthusiasts, to the beautiful province of Oaxaca, Mexico. Bringing together Oliver’s endless curiosity about natural history and the richness of human culture with his sharp eye for detail, this book is a captivating evocation of a place, its plants, its people, and its myriad wonders. Light and fast-moving, unburdened by library research but filled with erudition! – New Yorker

**Beyond the Psychoanalytic Dyad** John P. Muller 2014-01-14 In this original work of psychoanalytic theory, John Muller explores the formative power of signs and their impact on the mind, the body and subjectivity, giving special attention to work of the French psychoanalyst Jacques Lacan and the American philosopher Charles Sanders Peirce. Muller explores how Lacan’s way of understanding experience through three dimensions—the real, the imaginary and the symbolic—can be useful both for thinking about cultural phenomena and for understanding the complexities involved in treating psychotic patients, and develops Lacan’s perspective gradually, presenting it as distinctive approaches to data from a variety of sources.

**Recording for the Blind & Dyslexic, ... Catalog of Books** Recording for the Blind & Dyslexic 1996

**The Search for Faith and the Witness of the Church** Mission Theological Advisory Group 1996 This ecumenical report explores five areas of contemporary life that in some way affect every person in society. **Studying Those who Study Us** Diana Forsythe 2001 Diana E. Forsythe was a leading anthropologist of science, technology, and work who pioneered the field of the anthropology of artificial intelligence. This volume collects her best-known essays, along with other major works that remained unpublished upon her death in 1997. It is also an exemplar of how reflexive ethnography should be done.

**Parenting on the Autism Spectrum** Lynn Adams 2013-04-20

**A Leg to Stand On** Oliver Sacks 2011-06-16 ‘Oliver Sacks is a perfect antidote to the anaesthetic of familiarity. His writing turns brains and minds transparent’ - Observer When Oliver Sacks, a physician by profession, injured his leg while climbing a mountain, he found himself in an unusual position – that of patient. The injury itself was severe, but straightforward to fix; the psychological effects, however, were far less easy to predict, explain, or resolve: Sacks experienced paralysis and an inability to perceive his leg as his own, instead seeing it as some kind of alien and inanimate object, over which he had no control. A Leg to Stand On is both an account of Sacks’ ordeal and subsequent recovery, and an exploration of the ways in which mind and body are inextricably linked.

**Wax Tablets of the Mind** Jocelyn Penny Small 1997 In this volume, Jocelyn Small argues that literacy is a complex combination of various skills not just the ability to read and write: the technology of writing, the encoding and decoding of text symbols, the interpretation of meaning, the retrieval and display systems which organise how meaning is stored and memory. Wax Tablets of the Mind explores the relationship between literacy, orality and memory in classical antiquity, not only from the point of view of antiquity, but also from that of modern cognitive psychology. Jocelyn Small examines the contemporary as well as the ancient debate about how the writing tools we possess interact and affect the product, why they should do so and how the tasks required of memory change and develop with literacy’s increasing output and evoking technologies.

**The Mind’s Eye** Oliver Sacks 2011-06-16 How does the brain perceive and interpret information from the eye? And what happens when the process is disrupted? In The Mind’s Eye, Oliver Sacks tells the stories of people who are able to navigate the world and communicate with others despite losing what many of us consider indispensable senses and abilities: the capacity to recognize faces, the sense of three-dimensional space, the ability to read, the sense of sight. For all of these people, the challenge is to adapt to a radically new way of being in the world – and The Mind’s Eye is testament to the myriad ways that we, as humans, are capable of rising to this challenge. ‘Oliver Sacks is a perfect antidote to the anaesthetic of familiarity. His writing turns brains and minds transparent’ – Observer

**Forest School and Autism** Michael James 2018-04-19 Forest School’s innovative outdoor approach offers specific benefits to learners with autism, including increased social skills, raised self-esteem and improved sensory function. This guide raises autism awareness amongst practitioners by providing practical and easy-to-follow advice for adapting Forest School activities for those with autism. For those coming from a mainstream Forest School background, the author offers an introduction to autism and shows what Forest School can offer people with autism - both children and adults - with first-person accounts that highlight its success with this group. The guide gives advice on the social and sensory benefits, offers practical advice on safety and on how to set up a Forest School and finally presents specific activities to be incorporated into practitioners’ routines.

**The Martian Chronicles** Ray Bradbury 2012-04-17 The tranquility of Mars is disrupted by humans who want to conquer space, colonize the planet, and escape a doomed Earth.

**Investigating Couples** Tom Soter 2001-10-24 Male-female detective pairings often exhibit offbeat, dark humor and considerable chemistry as they investigate crimes. They have proven to be both entertaining and alluring on screen and television. This work reveals an evolutionary progression in the depictions of three detective duos: the married pair Nick and Nora Charles of The Thin Man, black-humored special agents John Steed and Emma Peel of The Avengers, and finally the smoldering Mulder and Scully in The X-Files. Ten chapters offer critical analysis, rich with background information and insider observations. Production comments are given throughout. Three appendices (one for each series) offer episode guides with original broadcast dates, credits and brief synopses.

**Seeing Voices** Oliver Sacks 2013-05-29 Like The Man Who Mistook His Wife for a Hat, this is a fascinating voyage into a strange and wonderful land, a provocative meditation on communication, biology, adaptation, and culture. In Seeing Voices, Oliver Sacks turns his attention to the subject of deafness, and the result is a deeply felt portrait of a minority struggling for recognition and respect—a minority with its own rich, sometimes astonishing, culture and unique visual language, an extraordinary mode of communication that tells us much about the basis of language in hearing people as well. Seeing Voices is, as Studs Terkel has written, “an exquisite, as well as revelatory, work.”

**The Pathology and Pharmacology of Mental Illness** Mark Wilbourn 2003 Specifically drawing physiology and pharmacology together in relation to client care, this text explores the major pharmacological treatments available. Information is continually referenced to case scenarios. Mental health nursing students and their lecturers should find the book of use.

**Handbook of Research on Diagnosing, Treating, and Managing Intellectual Disabilities** Gopalan, Rejani Thudalikunnil 2016-04-22 Intellectual disabilities can be difficult to detect in children prior to their school-age years. Throughout their lives, individuals with intellectual disabilities may require specialized care and support in order to lead healthy and fulfilled lives. The Handbook of Research on Diagnosing, Treating, and Managing Intellectual Disabilities is a pivotal reference source for the latest research on the effects of disabilities in intellectual functioning, examining the causes, treatment, and rehabilitation of such limitations in adaptive behavior. Highlighting empirical findings on the management of these disabilities throughout various stages of life, this publication is ideally designed for clinicians, researchers, special educators, social workers, and students actively involved in the mental health profession.

**What’s the Difference?** Amanda Y uill 2021-05-12 What’s the difference between teaching our students and our autistic students? Not much. This practical book argues that all students are unique. It focuses on integrating teaching autistic students into the teaching practice of the whole class. Based on extensive classroom experience, this highly readable book is full of anecdotes about engaged students growing in their learning. Lesson plans and checklists throughout the book help teachers get to know autistic students and help them with school work, emotional regulation, communication, socializing, and staying safe. This timely book champions getting rid of labels so teachers can know every student as an individual.

**Awakenings** Oliver Sacks 2013-05-29 Awakenings--which inspired the major motion picture--is the remarkable story of a group of patients who contracted sleeping-sickness during the great epidemic just after World War I. Frozen for decades in a trance-like state, these men and women were given up as hopeless until 1969, when Dr. Oliver Sacks gave them the then-new drug L-DOPA, which had an astonishing, explosive, “awakening” effect. Dr. Sacks recounts the moving case histories of his patients, their lives, and the extraordinary transformations which went with their reintroduction to a changed world.

**An Anthropologist on Mars** Oliver Sacks 1995 Profiles seven neurological patients, including a surgeon with Tourette’s syndrome and an artist whose color sense is destroyed in an accident but finds new creative power in black and white *An Anthropologist on Mars* Oliver Sacks 2012-11-14 To these seven narratives of neurological disorder Dr. Sacks brings the same humanity, poetic observation, and infectious sense of wonder that are apparent in his bestsellers Awakenings and The Man Who Mistook His Wife for a Hat. These men, women, and one extraordinary child emerge as brilliantly adaptive personalities, whose conditions have not so much debilitated them as ushered them into another reality.

**Encyclopedia of Anthropology** H. James Birx 2005-12-08 This five-volume Encyclopedia of Anthropology is a unique collection of over 1,000 entries that focuses on topics in physical anthropology, archaeology, cultural anthropology, linguistics, and applied anthropology. Also included are relevant articles on geology, paleontology, biology, evolution, sociology, psychology, philosophy, and theology. The contributions are authored by over 250 internationally renowned experts, professors, and scholars from some of the most distinguished museums, universities, and institutes in the world. Special attention is given to human evolution, primate behavior, genetics, ancient civilizations, sociocultural theories, and the value of human language for symbolic communication.

**Counselling for Asperger Couples** Barrie Thompson 2008-08-15 Counselling for Asperger Couples is the first book to provide a complete model for counselling couples where one partner has Asperger Syndrome (AS). The book provides details of the seven different stages of the model and includes anecdotal evidence from clients who have used it and whose relationships have been greatly helped by it. The author explains the importance of initial separate counselling and describes the co-counselling process, using case studies to demonstrate how the process works. The book offers a wealth of valuable advice on improving communication and cooperation and includes photocopiable activity sheets that couples can fill in and use to help understand each other better. Strategies and visual aids are also offered for dealing with or preventing anticipated future miscommunications. Based on considerable experience, this book will be invaluable for counsellors treating couples where one partner has Asperger Syndrome, or for couples that want to improve their relationship but may not have access to counselling. It will also be useful to teachers wanting better communication with AS pupils or parents wanting better communication with an AS child.

**The Man Who Mistook His Wife for a Hat** Dario Krpan 2017-07-05 In The Man Who Mistook His Wife for a Hat, neurologist Oliver Sacks looked at the cutting-edge work taking place in his field, and decided that much of it was not fit for purpose. Sacks found it hard to understand why most doctors adopted a mechanical and impersonal approach to their patients, and opened his mind to new ways to treat people with neurological disorders. He explored the question of deciding what such new ways might be by deploying his formidable creative thinking skills. Sacks felt the issues at the heart of patient care needed redefining, because the way they were being dealt with hurt not only patients, but practitioners too. They limited a physician’s capacity to understand and then treat a patient’s condition. To highlight the issue, Sacks wrote the stories of 24 patients and their neurological clinical conditions. In the process, he rebelled against traditional methodology by focusing on his patients’ subjective experiences. Sacks did not only write about his patients in original ways - he attempt to come up with creative ways of treating them as well. At root, his method was to try to help each person individually, with the core aim of finding meaning and a sense of identity despite, or even thanks to, the patients’ condition. Sacks thus redefined the issue of neurological work in a new way, and his ideas were so influential that they heralded the arrival of a broader movement - narrative medicine - that placed stronger emphasis on listening to and incorporating patients’ experiences and insights into their care.

**Legitimacy in Public Administration** O. C. McSwite 1997-07-02 In this “postmodern, end-of-the-century” moment, the question of what role public administration can legitimately play in a democratic society has deepened and taken on increased urgency. At the same time the movement toward global marketization has gained enormous momentum, traditional prejudices and racial and ethnic violence have appeared with a renewed virulence, presenting unprecedented challenges to democratic governments. Legitimacy in Public Administration reveals how the issue of administrative legitimacy is directly implicated, indeed central, to this broader issue. It argues that legitimacy hinges at the generic level on the question of alterityùhow to regard and relate to “different others.” This book reviews the history of the legitimacy issue in the literature of American public administration with the purpose of demonstrating that this discourse has been distorted by an underlying and undisclosed commitment to an elitist “Man of Reason” model of the public administrator.Es role. Current attempts to reformulate administration to meet the challenge of new conditions will fail, the author argues, because they have not escaped the grip of this implicit distortion. Legitimacy in Public Administration includes a challenging concluding chapter that uses insights from gender theory and demonstrates the connection between the legitimacy question and the critical problem of alterity. The author also offers a new way to fundamentally reframe the legitimacy question, so as not only to help the field of public administration resolve it, but to show how this resolution can create a new understanding of the problem of racial and ethnic prejudice.

**The End of Animal Farming** Jacy Reese 2018-11-06 A bold yet realistic vision of how technology and social change are creating a food system in which we no longer use animals to produce meat, dairy, or eggs. Michael Pollan’s The Omnivore’s Dilemma and Jonathan Safran Foer’s Eating Animals brought widespread attention to the disturbing realities of factory farming. The End of Animal Farming pushes this conversation forward by outlining a strategic roadmap to a humane, ethical, and efficient food system in which slaughterhouses are obsolete—where the tastes of even the most die-hard meat eater are satisfied by innovative food technologies like cultured meats and plant-based protein. Social scientist and animal advocate Jacy Reese analyzes the social forces leading us toward the downfall of animal agriculture, the technology making this change possible for the meat-hungry public, and the activism driving consumer demand for plant-based and cultured foods. Reese contextualizes the issue of factory farming—the inhumane system of industrial farming that 95 percent of farmed animals endure—as part of humanity’s expanding moral circle. Humanity increasingly treats nonhuman animals, from household pets to orca whales, with respect and kindness, and Reese argues that farmed animals are the next step. Reese applies an analytical lens of “effective altruism,” the burgeoning philosophy of using evidence-based research to maximize one’s positive impact in the world, in order to better understand which strategies can help expand the moral circle now and in the future. The End of Animal Farming is not a scolding treatise or a prescription for an ascetic diet. Reese invites readers—vegan and non-vegan—to consider one of the most important and transformational social movements of the coming decades.

**Gratitude** Oliver Sacks 2015-11-24 “My predominant feeling is one of gratitude. I have loved and been loved. I have been given much and I have given something in return. Above all, I have been a sentient being, a thinking animal, on this beautiful planet, and that in itself has been an enormous privilege and adventure.” —Oliver Sacks No writer has succeeded in capturing the medical and human drama of illness as honestly and as eloquently as Oliver Sacks. During the last few months of his life, he wrote a set of essays in which he movingly explored his feelings about completing a life and coming to terms with his own death. “It is the fate of every human being,” Sacks writes, “to be a unique individual, to

find his own path, to live his own life, to die his own death.” Together, these four essays form an ode to the uniqueness of each human being and to gratitude for the gift of life. “Oliver Sacks was like no other clinician, or writer. He was drawn to the homes of the sick, the institutions of the most frail and disabled, the company of the unusual and the ‘abnormal.’ He wanted to see humanity in its many variants and to do so in his own, almost anachronistic way—face to face, over time, away from our burgeoning apparatus of computers and algorithms. And, through his writing, he showed us what he saw.” —Atul Gawande, author of *Being Mortal*

**There’s Something About Mary** Peter Ludlow 2004-11-19 In Frank Jackson’s famous thought experiment, Mary is confined to a black-and-white room and educated through black-and-white books and lectures on a black-and-white television. In this way, she learns everything there is to know about the physical world. If physicalism—the doctrine that everything is physical—is true, then Mary seems to know all there is to know. What happens, then, when she emerges from her black-and-white room and sees the color red for the first time? Jackson’s knowledge argument says that Mary comes to know a new fact about color, and that, therefore, physicalism is false. The knowledge argument remains one of the most controversial and important arguments in contemporary philosophy. *There’s Something About Mary*—the first book devoted solely to the argument—collects the main essays in which Jackson presents (and later

rejects) his argument along with key responses by other philosophers. These responses are organized around a series of questions: Does Mary learn anything new? Does she gain only know-how (the ability hypothesis), or merely get acquainted with something she knew previously (the acquaintance hypothesis)? Does she learn a genuinely new fact or an old fact in disguise? And finally, does she really know all the physical facts before her release, or is this a “misdescription”? The arguments presented in this comprehensive collection have important implications for the philosophy of mind and the study of consciousness.

Oliver Sacks 2008 The author draws on the individual experiences of patients, musicians, composers, and ordinary people to explore the complex human response to music and how music can affect those suffering from a variety of ailments.
