Report of the Expert Workshop on Guidelines for Micro-finance, Credit and Insurance for Small-scale Fisheries in Asia Food and Agriculture Organization of the United Nations 2019-10-17 The Expert Workshop on Guidelines for Micro-finance, Credit and Insurance for Small-scale

Fisheries in Asia was held in Bangkok, Thailand in the period 7-9 May 2019. Rural finance, insurance and fisheries experts from Bangladesh, China, India, Indonesia, Japan, Philippines, Thailand, UK, Canada and the USA met to discuss ways to improve the access to financial services for small-scale fishers in Asia. The workshop aimed to discuss successful finance and insurance programmes in Asia for small-scale fishers, finalize practical guidelines in support of better access to financial services, and design a capacity building programme for increasing the provision of finance and insurance services to small-scale fisheries. The workshop was attended by 32 experts and was organized by the Asia-Pacific Rural and Agricultural Credit Association (APRACA) in close collaboration with FAO. The insurance and credit guidelines prepared will facilitate the implementation of the Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries in the Context of Poverty Eradication and Food Security (SSF Guidelines), as well as contribute towards achievement of Sustainable Development Goal 14. Access to finance and insurance services will enable the small-scale fishers to invest in more responsible fishing operations and technologies, reduce overfishing, contribute to fisheries management and implement climate change adaptation measures. The micro-finance, credit and insurance guidelines for small-scale fisheries have been endorsed by APRACA members in June 2019, and implementation throughout the Asian region is promoted.

Handbook of Child and Adolescent Group Therapy Craig Haen 2016-10-14 This handbook describes in detail different contemporary approaches to group work with children and adolescents. Further, this volume illustrates the application of these models to work with the youth of today, whether victims of trauma, adolescents struggling with LGBT issues, or youth with varying common diagnoses such as autism spectrum disorders, depression, and anxiety. It offers chapters presenting a variety of clinical approaches written by experts in these approaches, from classic (play therapy and dialectical behavior therapy) to cutting-edge (attachment-based intervention, mindfulness, and sensorimotor psychotherapy). Because of its broad scope, the book is suitable for a wide audience, from students to first-time group leaders to seasoned practitioners.

Meeting the Ethical Challenges of Leadership Craig E. Johnson 2011-02-28 The Fourth Edition retains the elements of the text that have contributed to its success while also broadening its appeal. Written in an informal, accessible style, author Craig E. Johnson takes an interdisciplinary approach to leadership ethics while blending research and theory with practical application. This unique text promotes ethical decision-making and action through skill development, self-assessment, and application exercises. In the Fourth Edition: - A new chapter, Ethical Crisis Leadership, explains five ethical principles and strategies that are essential to fulfilling moral duties during times of crisis. - 'Leadership Ethics at the Movies' features present short summaries of feature films that portray ethical dilemmas. Discussion starters are included to prompt readers to draw ethical implications and applications from the films. - 'Self-Assessment' features measure the reader's performance on an important behaviour, skill, or concept discussed in the chapter - 'Implications and Applications' review key ideas and their ramifications for the reader as a leader - 'For Further Exploration, Challenge, and Assessment' encourages readers to engage in extended reflection and self-analysis - 'Focus on Follower Ethics' boxes that broaden coverage of the text and introduce concepts students can apply to their role as followers - Three cases per chapter offer real-world examples for analysis and reflection - A lengthy reference section at the end of the book serves as a starting point for further research and exploration Instructors Resources include teaching strategies, a test bank, sample syllabi, assignment descriptions, and more.

International Handbook of Metacognition and Learning Technologies Roger Azevedo
2013-04-23 Education in today's technologically advanced environments makes complex cognitive demands on students pre-learning, during, and post-learning. Not surprisingly, these analytical learning processes--metacognitive processes--have become an important focus of study as new learning technologies are assessed for effectiveness in this area. Rich in theoretical models and empirical data, the International Handbook of Metacognition and Learning Technologies synthesizes current research on this critical topic. This interdisciplinary reference delves deeply into component processes of self-

regulated learning (SRL), examining theories and models of metacognition, empirical issues in the study of SRL, and the expanding role of educational technologies in helping students learn. Innovations in multimedia, hypermedia, microworlds, and other platforms are detailed across the domains, so that readers in diverse fields can evaluate the theories, data collection methods, and conclusions. And for the frontline instructor, contributors offer proven strategies for using technologies to benefit students at all levels. For each technology covered, the Handbook: Explains how the technology fosters students' metacognitive or self-regulated learning. Identifies features designed to study or support metacognitive/SRL behaviors. Reviews how its specific theory or model addresses learners' metacognitive/SRL processes. Provides detailed findings on its effectiveness toward learning. Discusses its implications for the design of metacognitive tools. Examines any theoretical, instructional, or other challenges. These leading-edge perspectives make the International Handbook of Metacognition and Learning Technologies a resource of great interest to professionals and researchers in science and math education, classroom teachers, human resource researchers, and industrial and other instructors.

Survey of the Academic Library Role in Course Management Systems Primary Research Group
2013 The study looks closely at how academic libraries present themselves in the course management system, and the role that they play in developing it and training faculty and students to use it. The report gives detailed data on library staff time devoted to the course management system, the role the library plays in information literacy regarding the course management system, the degree to which libraries offer courses through the CMS, and the degree to which library resources such as course reserves, LibGuides and other subject and course guides, inter-library loan requests, and other library services are integrated into the CMS. Data is broken out by size and type of academic library and for different CMS systems.

Handbook of Applied Behavior Analysis John

Austin 2000-05-01 Applied Behavior Analysis (ABA) is a highly functional discipline that, instead of searching for abstract, internal causes for human behavior, looks to external factors that can be influenced. Once identified, these factors can be manipulated to make meaningful, positive improvements in the lives of real people through positive behavior change. Not surprisingly behavior analysis has been applied to a wide range of human activities, from helping troubled teens to organizing industry to maximizing sports performance. ABA interventions for these diverse problems are often creative-and they tend to be effective. In this volume, some of the field's foremost practitioners offer their expert perspective on a range of topics within ABA. Each chapter is fully referenced and contains a set of reading objectives to facilitate deeper understanding and further discussion of its subject area. While these discussions will be of particular interest to academic behavior analysts and graduate students, clinicians and other practitioners will find the research review helpful and informative.

The Hacker's Handbook Susan Young

2003-11-24 This handbook reveals those aspects of hacking least understood by network administrators. It analyzes subjects through a hacking/security dichotomy that details hacking maneuvers and defenses in the same context. Chapters are organized around specific components and tasks, providing theoretical background that prepares network defenders for the always-changing tools and techniques of intruders. Part I introduces programming, protocol, and attack concepts. Part II addresses subject areas (protocols, services, technologies, etc.) that may be vulnerable. Part III details consolidation activities that hackers may use following penetration.

A Handbook of Public Speaking for Scientists and Engineers Peter Kenny 1982-01-01 A Handbook of Public Speaking for Scientists and Engineers helps scientists and engineers improve their skills at speaking in public in the course of their professional activities. The book shows how best to prepare papers for presentation at a technical conference and how to put cases to committee meetings. Not only does the book deal with specific events, but it also provides the

techniques of more effective speaking, whether presenting papers, answering questions, or speaking "off-the-cuff." The book is written in a highly entertaining manner and should put all complacent lecturers on their guard. This is essential reading for every scientist and engineer called upon to speak in public on technical matters.
