**Curriculum Practice in the Elementary and Middle School** J. Allen Queen 1999 This first edition book offers very current treatment of curriculum issues, instructional planning, and new curriculum standards. The book integrates elements of the major historical, philosophical, and social influences upon past curriculum development. It compares traditional and futurist philosophies and describes the developmental aspects of children and their changing needs and interests within a framework of instructional expectations at specific grade levels. It also teaches the skills of curriculum development and instructional design. While a balanced coverage of viewpoints has been attempted, the book is intended to open new avenues by including educational futurism in a curricular model. It

contains key chapter concepts, focus questions, a futurist curriculum model, actual units of instruction, and exercises for the reader to try. For educators at the elementary and middle school levels.

**Among the Hidden** Margaret Peterson Haddix 2002-06-12 In a future where the Population Police enforce the law limiting a family to only two children, Luke, an illegal third child, has lived all his twelve years in isolation and fear on his family's farm in this start to the Shadow Children series from Margaret Peterson Haddix. Luke has never been to school. He's never had a birthday party, or gone to a friend's house for an overnight. In fact, Luke has never had a friend. Luke is one of the shadow children, a third child forbidden by the Population Police. He's lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family's farm, he is no longer even allowed to go outside. Then, one day Luke sees a girl's face in the window of a house where he knows two other children already live. Finally, he's met a shadow child like himself. Jen is willing to risk everything to come out of the shadows—does Luke dare to become involved in her dangerous plan? Can he afford not to?

**The Integration Debate** Chester Hartman 2009-09-11 Racial integration, and policies intended to achieve greater integration, continue to generate controversy in the United States, with some of the most heated debates taking place among long-standing advocates of racial equality. Today, many nonwhites express what has been referred to as "integration exhaustion" as they question the value of integration in today's world. And many whites exhibit what has been labeled "race fatigue," arguing that we have done enough to reconcile the races. Many policies have been implemented in efforts to open up traditionally restricted neighborhoods, while others have been designed to diversify traditionally poor, often nonwhite, neighborhoods. Still, racial segregation persists, along with the many social costs of such patterns of uneven development. This book explores both long-standing and emerging controversies over the nation's ongoing struggles with discrimination and segregation. More urgently, it offers guidance on how these barriers can be overcome to achieve truly balanced and integrated living patterns.

*Middle Grades Research* David L. Hough 2009-09-01 Middle Grades Research: Exemplary Studies Linking Theory to Practice is the first and only book to present what is perhaps the most thoroughly scrutinized group of studies focusing on middle grades education issues ever assembled. Each research project undertaken by the contributing authors herein resulted in the publication of a scholarly paper. As a collection, the ten studies featured in this book are the crème de la crème of submissions to the Middle Grades Research Journal between August 2006 and December 2008. They are the ten highest peer reviewed manuscripts examined by members of the MGRJ Review Board - each having undergone careful "blinded" examination by three or more experts in the sub-specialty area addressed by the research study conducted. In addition, each study serves to exemplify how sound, practical research findings can be linked to classroom practice in middle grades classrooms. Middle Grades Research: Exemplary Studies Linking Theory to Practice is a must read for university professors and a useful tool for middle grades educators across all subject areas and school settings. Professors who teach middle grades courses, at both the undergraduate and graduate levels, will find the book to be a superb supplemental / accelerated readings text. Every college-level middle grades education course should make this book an integral part of class discussions. The book is also an excellent professional development study group resource for middle grades principals and classroom teachers across all subject areas. School level "Professional Learning Communities" (PLCs) will find that Dr. Hough's book stimulates scholarly thought, promotes discussion, and demonstrates how educational theory can and should impact teaching and learning.
