*Iron and Blood* Joshua Dalzelle 2017-01-31 The Black Fleet Saga continues... A human planet has been invaded. The enigmatic Darshik have landed troops on a frontier world and have begun subduing major cities even as their blockade repels all attempts by the fledgling United Terran Federation to mount a counteroffensive. The Federation's military command is desperate and with their fleet still in tatters they make a last ditch effort to free the planet: They pull Captain Jackson Wolfe out of retirement and put him in command of a ship they hope can get past the defending armada and provide support to the beleaguered Marines and civilians fighting on the surface of the contested world. There is no reasoning with this enemy. If the Terran Federation wants their planet back, they will have to pay the price. Iron & Blood is the second book of The Expansion Wars Trilogy and the fifth book of the Black Fleet Saga.

**Beyond Blood** Pamela D. Palmater 2011-05-13 The current Status criteria of the Indian Act contains descent-based rules akin to blood quantum that are particularly discriminatory against women and their descendants, which author Pamela Palmater argues will lead to the extinguishment of First Nations as legal and constitutional entities. Beginning with an historic overview of legislative enactments defining Indian status and their impact on First Nations, the author examines contemporary court rulings dealing with Indigenous identity, Aboriginal rights, and the Canadian Charter of Rights and Freedoms. Palmater also examines band membership codes to determine if their reliance on status criteria perpetuates discrimination. She offers changes for determining Indigenous identity and citizenship and argues that First Nations must determine citizenship themselves.

**Beyond Blood Identities** Jason D. Hill 2009 In this highly original work, Jason D. Hill argues that strong racial, ethnic, and national identities function according to a separatist logic that does irreparable damage to our moral lives. Drawing on scholarship in philosophy, sociology, and cultural anthropology, the author boldly develops a new version of cosmopolitanism he coins posthuman cosmopolitanism, according to which only individual persons—not cultures, races, or ethnic groups—are the bearers of rights and the possessors of an inviolable status worthy of respect. **Beyond Blood** S. Clarence Dodge M.D. 2020-12-15 Saturday, December 14, 2013. The case ended up taking seven hours. Her incision stretched from pubic bone to sternum. Although saturated with narcotic, she awakened writhing in pain. Any more pain meds . . . and she'd quit breathing. With help to carefully turn and position her onto her side, I then slipped in an epidural catheter. I put it up high, to be sure the band of numbness would cover the length of her incision. Within minutes after the first dose, she morphed into an entirely different person, chatting with us. Need for IV narcs, gone. She was able to take deep breaths and cough without

pain. How could I have lived with myself had I not taken this extra step? It likely helped shorten her hospital stay and reduce the cost. Curses to any payer claiming epidurals for post-op pain are not necessary. Damn any CEO taking credit for the savings while putting a portion into his own pocket.

*Beyond the Living Dead* Bruce Peabody 2021-09-13 In 1968, George Romero's film *Night of the Living Dead* premiered, launching a growing preoccupation with zombies within mass and literary fiction, film, television, and video games. Romero's creativity and enduring influence make him a worthy object of inquiry in his own right, and his long career helps us take stock of the shifting interest in zombies since the 1960s. Examining his work promotes a better understanding of the current state of the zombie and where it is going amidst the political and social turmoil of the twenty-first century. These new essays document, interpret, and explain the meaning of the still-budding Romero legacy, drawing cross-disciplinary perspectives from such fields as literature, political science, philosophy, and comparative film studies. Essays consider some of the sources of Romero's inspiration (including comics, science fiction, and Westerns), chart his influence as a storyteller and a social critic, and consider the legacy he leaves for viewers, artists, and those studying the living dead.

**Beyond Blood and Coercion** Yves Winter 2009 This dissertation investigates and criticizes two common assumptions about violence in contemporary political theory and philosophy: that violence is mute and that it is instrumental. Through close readings of the works of Niccolò Machiavelli, Karl Marx, and Friedrich Engels, I argue that political violence has a semiotic character, that it involves the production of signs and meanings. These signs and meanings are not peripheral but central to the operations of political violence, because the political effectiveness of violence is partially determined by its representation. Practices of representation regulate how political violence is received and understood by an audience, which is why political violence cannot be explained by reference to institutions alone. Rather, it must be interpreted in the context of these practices of representation. It calls, therefore, for a critical hermeneutic attentive to how meanings and signs circulate beyond violence's narrowly functional and instrumental dimensions and beyond the control of violence's wielders. My readings offer a model for such an interpretive approach, for a critical hermeneutic that accounts for the semiotic aspects inherent in practices of political violence. My textual analyses ask how modes of representation and visibility organize particular formations of violence and produce political effects. By tracing the disseminations and dispersals of violence in Machiavelli's and Marx's texts, I challenge the conventionla classification that separates political from non-political violence, and I raise the question of what makes violence recognizable as political.

**Beyond Blood** Duncan Kimani Kamau 2019-10-22 The true-life story of how three men helped save the lives and families of thousands living with HIV/AIDS in East Africa. □Written by three co-founders of CARE for AIDS—a nonprofit providing support for men and women living with HIV/AIDS in East Africa—Beyond Blood is the true-life account of how three men from drastically different backgrounds came together to form a grassroots nonprofit that has empowered thousands of HIV-positive people in East Africa to live lives beyond AIDS. This is the story of how Justin T. Miller, an American Vanderbilt undergraduate student, met Duncan Kimani Kamau and Cornel Onyango Nyaywera, two men who had grown up witnessing firsthand the devastating effects of HIV/AIDS in their own communities in Kenya. Though Kamau and Nyaywera grew up in opposite ends of the country and came from opposing tribes, they overcame prejudice and cultural expectations to bring healing to their communities. With Miller's help, their dream of empowering people to live a life beyond AIDS became a reality. Once Kamau, Miller, and Nyaywera realized their common purpose, CARE for AIDS was born. But it was only the beginning of their

fight against AIDS, as they quickly discovered the fear and stigma that blanketed the disease. If their fledgling nonprofit was going to empower anyone, they would need help—and they found it, one local church at a time. As they slowly but steadily grew their network of friends and allies, Kamau, Miller, and Nyaywera discovered that the most complex problems can be solved through intentional, redemptive relationships.

**New European Identity and Citizenship** Remy Leveau 2018-02-06 This title was first published in 2002. This study, undertaken with the support of the Ford Foundation under the scientific leadership of Khadija Mohsen-Finan, Remy Leveau and Catherine Wihtol de Wenden considers the new forms of citizenship and identity that have emerged within the settlements of immigrant populations in various countries in Europe. Through their claims to citizenship, shifting religious identities and by occupying the high ground both locally and at European level, these communities challenge long standing citizenship models and give full meaning to the concepts of supranational European citizenship. The contributors question whether such European citizenship will include all residents of Europe or whether it will serve to increase the exclusion felt by certain groups of migrants. In particular the contributors examine the implications of three emerging citizenship trends - the impact of the demand for Islam; the emergence of undocumented migrants and their inclusion in an increasingly stratified society; and finally, the rising tide of ordinary or political refugees who are challenging European citizenship on their own terms.

*Blood Type Infected 2* Matthew Marchon 2018-09-28 They thought the first day of the zombie outbreak was bad. Tensions rise to an all time high when a new leader takes control of the bus, only to turn that power over to someone far more maniacal. Someone with an agenda that goes beyond survival, an agenda not meant for everyone to survive. And just when you think things can't get any worse, Noah's worst case scenario becomes reality. Only two more days until the evacuation center is operational, but will they even be able to last one? The undead masses have multiplied. Running is no longer an option. It's time to find weapons and fight, not just the bloodthirsty hordes of walking corpses, but each other. Sometimes the destructive tendencies of mankind are too much to endure. Sometimes there's nothing left to do but watch your last hope go up in flames. Sift through the ashes. Bury those you've lost. Mourn what will never be. And find a way to carry on. Alliances are made. Friendships forgotten. Families torn. Another day stolen in a world not meant for the living. But how long can you survive off nothing but adrenaline and hope?
