**Radio Frequency and Microwave Electronics Illustrated** Matthew M. Radmanesh 2001 Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

**Women Entrepreneurship in India** Namita Kumari The starting point for the book is the low economic activity of women in India, and hence, both governmental and NGO-based activities to raise the level of women's participation to Indian economy, and through that, the increase in women's economic and social independence. The book focuses on elementary and important issues of entrepreneurship and women in any economy. Prof. Anne Kovalainen School of Economics University of Turku, Finland The book focuses on three NGOs and their activities in enhancing and promoting women's entrepreneurial activities in three different areas in India. The empirical material consists of interview materials as well as background data and reports, national level statistics and other figures that are used to describe the Indian situation in general, and specifically those conditions from where women's entrepreneurial activities arise, such as gender equality and legislation frameworks. The book is very important, not only for the women's entrepreneurship and economic activity but for the Indian society at large. Prof. Paola Villa Department of Economics University of Trento, Italy This book is a product of extensive and intensive research. The book aptly highlights and proves the importance of NGOs in promoting women entrepreneurship. Given the rigors of research methodology, the book will also serve as a model for future research on the related dimensions of women entrepreneurship. Prof. Italo Trevisan Department of Economics and Management University of Trento, Italy Women's empowerment in India remains a daunting task for governmental and non-governmental organizations alike. Given the importance of economic empowerment of women, this study provides an

overview of the entrepreneurship as a means to economic empowerment of Indian women. Dr. Suman Sharma Officer on Special Duty(OSD) Dayal Singh College (Evening) University of Delhi
