A major portion of the book will provide the reader with an insider's view of these strategies as well as a plan for implementation, with one chapter devoted to experiential exercises to enhance cultural sensitivity in supervision and training. Our Bodies, Ourselves for the New Century Boston Women's Health Book Collective 1998 The first major revision of the 1984 classic guide to women's health includes information on such topics as breast cancer treatment options, preventing and living with AIDS, and new developments in contraception and reproductive technology. Reprint. 100,000 first printing. Why So Slow? Virginia Valian 1999-01-07 Virginia Valian uses concepts and data from psychology, sociology, economics, and biology to explain the disparity in the professional advancement of men and women. Why do so few women occupy positions of power and prestige? Virginia Valian uses concepts and data from psychology, sociology, economics, and biology to explain the disparity in the professional advancement of men and women. According to Valian, men and women alike have implicit hypotheses about gender differences—gender schemas—that create small sex differences in characteristics, behaviors, perceptions, and evaluations of men and women. Those small imbalances accumulate to advantage men and disadvantage women. The most important consequence of gender schemas for professional life is that men tend to be overrated and women underrated. Valian's goal is to make the invisible factors that retard women's progress visible, so that fair treatment of men and women will be possible. The book makes its case with experimental and observational data from laboratory and field studies of children and adults, and with statistical documentation on men and women in the professions. The many anecdotal examples throughout provide a lively counterpoint.

Family Mediation Howard H. Irving 2002-10-01 It is important to understand that when a marriage is over, it is not the time for retribution and revenge, but rather the opportunity to strike out for a new life while providing for and protecting the children. This book — the first comprehensive treatment of family mediation for Chinese families — provides the knowledge and skills to achieve that objectives. Throughout the book the author discusses practical techniques for resolving family conflicts and creating parenting plans. The model described enables mediators — who may be social work, psychology or legal professionals — to negotiate the issues in dispute so as to arrive at a settlement that is mutually acceptable, and is fair and equitable to the families. Divorcing couples should also read the book because it will help them with ideas and principles leading towards amicable solutions.

Couples, Gender, and Power Carmen Knudson-Martin, PhD 2009-02-16 "[A] comprehensive, critical, empirical, and practical compilation of investigations about how diverse couples are trying to implement change and pursue equality in their relationships." -Katherine R. Allen, PhD Virginia Polytechnic Institute & State University "[A] true gift to couple research. The studies reported in this marvelously disciplined collection hold living implications for couples and their therapists." - Evan Imber-Black Director, Center for Families and Health, Ackerman Institute for the Family While numerous couples strive for equality in their relationships, many are unaware of the insidious ways in which gender and power still affect them—from their career choices to communication patterns, child-rearing, housework, and more. Written for mental health professionals and others interested in contemporary couple relationships, this research-based book shows how couples are able to move beyond the dangers of gendered inequality and the legacy of hidden male power. The book analyzes the relationships of couples from various racial, ethnic, and socioeconomic backgrounds. The contributors present innovative clinical interventions, and suggest strategies therapists can use to help couples transform their relationships from being gender-based to equality-based. Explores these key issues: The risks of being in a relationship ruled by "gender legacy" behavior The differences between couples who get caught in gender legacy patterns and those who do not Gender-based patterns across the life cycle, including newly formed couples; early marriage; child-rearing; mothering and fathering Gendered power in couples dealing with illness; ethnic and racial differences; immigration and displacement issues

Handbook of the Clinical Treatment of Infidelity Katherine Milewski Hertlein 2013-03-07 Help your clients' relationships survive infidelity! In the Handbook of the Clinical Treatment of Infidelity, a panel of seasoned experts reflects on issues central to affairs, and on how to help couples heal and learn from them. First, editors Fred P. Piercy, Katherine M. Hertlein, and Joseph L. Wetchler provide an essential overview of infidelity theory, research, and treatment. They discuss the effect of infidelity on couples and delineate three types of infidelity—emotional, physical, and infidelity including aspects of both. They review the relatively new role of the Internet in infidelity and explore infidelity within the context of comarital relationships. Finally, they discuss the overarching theories and common models used in infidelity treatment. Also in the Handbook of the Clinical Treatment of Infidelity: Susan M. Johnson, the co-developer of Emotionally Focused Therapy (EFT), discusses affairs through the lens of attachment theory, and shows how EFT provides a way to acknowledge and express pain, remorse, and regret, and to repair this attachment bond. David Moultrup takes a Bowenian approach to infidelity, focusing attention on the underlying dynamics of the emotional system Frank Pittman and Tina Pittman Wagers outline cultural myths about affairs and do their share of debunking Adrian Blow discusses how to help couples directly address their pain—and the challenges of the healing process Brian Case highlights the role of apology and forgiveness in the healing process Frank Stalfa and Catherine Hastings focus on the treatment of "accusatory suffering"—a spouse's obsessive holding onto and retaliating for an affair long after it has ended, and despite the offending partner's repeated apologies and attempts at restitution Don-David Lusterman discusses individuals who have suppressed or denied traumatic stress reactions to their partner's affair, and how to help them Scott Johnson discusses myths about affairs, from who is cheating on whom, to whether men really have more affairs than women, to the blame-filled language of "affairs," "betrayal," and "infidelity," asking us to think more systematically about affairs and to see the dynamics of extra dyadic relationships as more complex and nuanced than they are typically portrayed in the literature Joan Atwood provides an overview of Internet infidelity—the factors influencing one's involvement in this type of infidelity, and some considerations for therapists Tim Nelson, Fred Piercy, and Doug Sprenkle report on the results of a multi-phase Delphi study that explored what infidelity experts say are the critical issues, interventions, and gender differences in the treatment of Internet infidelity Monica Whitty and Adrian Carr draw upon Klein's object relations theory and discuss how this might influence the way people rationalize their Internet infidelity Emily Brown outlines the concept of the Split Self Affair—discussing its origins, characteristics, and implications for individuals and couples, and providing detailed information on how to work with these couples in therapy Michael Bettinger presents extra dyadic relationship as a fact, rather than a problem, within many gay male relationships—a discussion that shows how gay male polyamory can work as an alternative to the heterosexual model of emotional and sexual exclusivity in romantic dyadic relationships Katherine Hertlein and Gary Skaggs report on the results of a study that assessed the level of differentiation and one's engagement in extra dyadic relationships The Handbook of the Clinical Treatment of Infidelity is essential reading for today's (and tomorrow's) clinicians who work with couples. Balancing Family and Work Toni Schindler Zimmerman 2001 Offers therapists ideas for helping clients (and themselves) balance family life and work. Explores both theoretical and immediately applicable ideas for helping clients achieve and improved balance between work life and family life. Shades of Gray Lynn Hennighausen 2002-03 Mother's guide to work and family choices *Growing Yourself Up* Jenny Brown 2017-11-01 To be human is to be in relationships. We can't survive without them but it's in relationships that we can so easily get unravelled. Some relationships just seem to do us in. Either we feel like we lose ourselves or feel burnt out from futile efforts to make things right for another. In our relationships we can experience the very best of ourselves and the very worst. The message of Growing Yourself Up is that you can't separate understanding the individual from understanding relationships. All of life's relationships are integral to increasing self-awareness and maturity. And it's not necessarily the comfortable relationships that promote personal growth. In this 2nd edition of the bestselling book, Jenny examines how to help others without fostering dependency, and how to determine what kind of help you or others want from therapists. This is in response to the many lay and professional people who have found this book valuable personally and want to know how to help others grow. Drawing from Bowen family systems theory, the book takes you on a journey through each stage of life to see predictable patterns of relationships and to show how to use this knowledge to make purposeful adjustments in yourself; as well as lending a mature helping hand to others. The result is a sturdier self, sturdier relationships and a refreshing new way to view life's challenges and opportunities.

The Genogram Casebook: A Clinical Companion to Genograms: Assessment and Intervention Monica McGoldrick 2016-08-16 A long-awaited workbook companion to Monica McGoldrick's highly successful textbook *Genograms*. This clinical companion to the bestselling *Genograms: Assessment & Intervention* uses case examples to articulate the most effective ways to use genograms in clinical practice. Widely utilized by family therapists and health care professionals, the genogram is a graphic way of organizing the mass of information gathered during a family assessment and finding patterns in the family system for more targeted treatment. For a client with cutoff relationships or a history of trauma, it can be hard to talk to a therapist about past and present relationships. Genograms are a non-intrusive and non-confrontational way to learn about a client's history and chart crucial, complex information for effective assessment and therapy. The *Genogram Casebook* deploys richly detailed case examples to address resistance to genograms, overcoming dysfunctional relationship patterns, working with couples, navigating issues of divorce and remarriage, using genograms in family sessions with children, repairing conflict and cutoff with family members, looking at the therapist's own family, and much more. It's a vibrantly practical, decisively essential guide to the use of genograms in mental health practice.

Creating Connection Judith V. Jordan 2014-05-01 Relational-Cultural Therapy (RCT) is developed to accurately address the relational experiences of persons in de-valued cultural groups. As a model, it is ideal for work with couples: it encourages active participation in relationships, fosters the well-being of everyone involved, and acknowledges that we grow through and toward relationships throughout the lifespan. Part and parcel with relationships is the knowledge that, whether intentionally or not, we fail each other, misunderstand each other, and hurt each other, causing an oftentimes enduring disconnect. This book helps readers understand the pain of disconnect and to use RCT to heal relationships in a variety of settings, including with heterosexual couples, lesbian and gay couples, and mixed race couples. Readers will note a blending of approaches (person-centered, narrative, systems, and feminist theory), all used to change the cultural conditions that can contribute to problems: unequal, sometimes abusive power arrangements, marginalization of groups, and rigid gender, race, and sexuality expectations. Readers will learn to help minimize economic and power disparities and encourage the growth of mutual empathy while looking at a variety of relational challenges, such as parenting, stepfamilies, sexuality, and illness. Polarities of "you vs. me" will be replaced with the healing concept of "us."

Parenthood in America Jack C. Westman 2001 In this outgrowth of a conference called *Parenthood in America*, held at in April 1998, Westman (emeritus, psychiatry, U. of Wisconsin Medical School) identifies the parent-child relationship as the fundamental institution in our society, one that fosters a lifelong ability to form and sustain intimate relationships and be a thoughtful, moral person. He argues for a shift in thinking toward the use of quality of life, rather than material achievement, as the central measure of success. The work's 23 articles bring insights from research to bear on the practical aspects of childrearing and on policies that influence the context in which parenting occurs in the home and in the community.
